

Samia Saghir

Frontend-Developer

I am passionate about mastering new technologies, transforming concepts into functional applications, and collaborating with dedicated teams to create efficient solutions tailored to user needs. My goal is to apply theoretical knowledge and expand my practical skills in a real-world setting, contributing to innovative and impactful projects.

PERSONAL PROJECTS

Restaurant For Table Reservation (2021)

- The main purpose to build this system to provide reservation service by online to the customer
- The services that are provide to see the menu list and reservation of table **using Technologies** html css bootstrap javascript
- [GitHub - SamiaSaghir89/resturant-for-table-reservation](#) 🔗

Amazon-Clone(2022)

- The e-commerce website of Amazon was initially put together with simple HTML, CSS and JavaScript. But as time progressed and different frameworks came into the limelight, the website got a makeover.
- Through this project, we'll discover a way to build a functional clone of Amazon's e-commerce website, relying on React
- [GitHub - SamiaSaghir89/Amazon-clone: On React Js](#) 🔗

YumFood(2023)

- I created "YumFood" using the MERN (MongoDB, Express.js, React, Node.js) technology stack. YumFood is an online food ordering and delivery platform designed to make the process of ordering and delivering food easy and seamless.
